User Sentence	Reference Sentence
Vector Space Model with Cosine Similarity Measure Here, we have used vector space model using unigram, bigram and trigram approaches	In this work, we use sine and cosine functions of different frequencies: $PE(pos, 2i) = \sin(pos/100002i/d \text{ model})$ $PE(pos, 2i+1) = \cos(pos/100002i/d \text{ model})$ where pos is the position and i is the dimension

Match 2 - 50.70000076293945%

User Sentence	Reference Sentence
The pre-processed dataset consists of collection of documents and represented as a bag of words of unigram, bigram and trigram	For English-French, we used the significantly larger WMT 2014 English-French dataset consisting of 36M sentences and split tokens into a 32000 word-piece vocabulary [38]
